Module 1 Questions

It's important for all internet users to be digitally "savvy" about potential dangers online. These can be in the form of scams or schemes that will steal your personal information, infect your computer with viruses, or violate your privacy in some other way.

1.) From the "Spotting Scams" document, list 4 of the Phishing Features you can find in the first email from no_reply@emailinternet.chase.com

2.) From the "Spotting Scams" document, list 4 of the Phishing Features you can find in the second email from custservice@paypalonline.com

3.) From the "Spotting Scams" document, list 4 of the Phishing Features you can find in the third email from Swiss International Lottery.

4.) Short Essay (please answer with complete sentences in paragraph form)
What kinds of information do identity thieves look for?

5.) Short Essay (please answer with complete sentences in paragraph form)
How do thieves try to get your information?

6.) Short Essay (please answer with complete sentences in paragraph form)
What are some things you can do to avoid falling for online scams?

7.) Short Essay (please answer with complete sentences in paragraph form) - This essay question has 3 parts. You will be writing a Password Security Advice Guide for teens. Your guide will need:

- a.) an introduction explaining why password security is important
- b.) include 3 points of advice or guidelines that you believe are the most important for teens to know/do regarding password security
- c.) include an example of a secure password you make up yourself in which you explain how you came up with the password and why it is secure.
