Module 6 Project

Bookmarking and Tagging

Tagging is a way of categorizing your bookmarks on Diigo that will allow you to sort and quickly find any site you've bookmarked in the past. It doesn't matter if you've bookmarked thousands of sites on Diigo - if you tag them, you will be able to find them quickly whenever you want them!

When you find a site you want to bookmark, whether it's for school or personal, think about what category that might be in. For example, if I like to check sports scores on the ESPN site, I might bookmark it, then add tags like "sports", and "basketball". Later, when I want to find sports scores, I would just search my Diigo account for "sports", and my ESPN site would show up, along with any other sites I tagged under that category.

Diigo often suggests tags - you don't have to use any of them, but if you do, it makes it easy for you to just click on them. You can tag one site with as many tags as you want, but don't use too many - I would suggest no more than 3 or 4.

2 IMPORTANT THINGS:

1. YOU MUST SET UP A DIIGO ACCOUNT!
2. FIND THE ICON ON YOUR BROWSER! (Top right of browser screen, next to the web address bar.)

Practice Bookmarking and Tagging

Below is a list of sites for you to check out. Go to each link (you can hit the back button to return to the assignment), check out the site to get an idea of what it's for, and bookmark it in Diigo. Then, add 3 tags for each site. Finally, bookmark and tag 5 more sites of your choosing using Diigo. In total, you should have 15 bookmarked and tagged pages. Check in with your teacher to see how he or she would like to review your work on this assignment.
