Module 7 Mind Mapping

- 1.) You have been given links to 4 different mind mapping (sometimes known as “concept mapping”) tools: [Collabrify](#), [Bubbl.us](#), [Mindomo](#), and [MindMeister](#). Be sure to explore them all to decide which ones you like the most.

- 2.) You are to use any 2 of these tools you like to create your own concept maps for the following assignment. Make sure to make use of their various tools for color, graphics, or images if they have them.

- 3.) Your first concept map (using one of the above tools) should explore the question, "What are your favorite types of music and why?" Be sure to include several examples (at least 3 types of music, with 3 examples (artists and their songs - a link to a song perhaps?!) on your map. Take a screenshot of as much of your map as you can and submit it to your teacher.

- 4.) Your second concept map (using a **different** one of the above tools) should explore the question, "What are some options for students after they graduate from high school, and what are some jobs they could lead to?". Take a screenshot of as much of your map as you can and submit it to your teacher.
