

Video Assignment

For this assignment, you will be using one of the movie makers in Module 14 – iMovie, the web-based movie tool WeVideo, or Windows Live Movie Maker. If you have another favored movie maker tool, please feel free to utilize it!

Your assignment is to create a **3 minute video** that tells about you without actually showing you! That means you will not appear in the video, but we will learn more about your interests, hobbies, and where you live through the video and photo footage you include. This video is for an “About the author” page on your Weebly Website and to be posted on your blog.

Here are the requirements for components that **MUST** be included in your project:

1. A title slide that represents you – You may use your first name as much as you want, but you are NOT to include your last name or footage/images of you anywhere in the movie.

2. At least 3 **different** video clips that show 3 things about you – this can be things like your town or village, pets, hobbies, sports, or other interests. You could also include your plans, hopes, and dreams for the future after high school.

3. At least 2 still photos that are incorporated into the video – these photos must also represent something about you.

4. Either voice-over or text narration, so that we are not ONLY seeing images, we have some information to go along with them.

When you have finished shooting your video and photos, load them into the movie-making tool you plan to use, and then use the editing options available to edit for length, and to add your title, text and/or voice.

When you have finished editing and have a movie you are happy with, publish it to YouTube.

Then, get the embed code, and embed the video into a blog post and an “About the author” page on your Weebly website with an appropriate caption.
